HUMOR – The Laws of Computing - 1. When computing, whatever happens, behave as though you meant it to happen. **2.** When you get to the point where you really understand your computer, it's probably obsolete. **3.** When the going gets tough, upgrade. **4.** To err is human...to blame your computer for your mistakes is even more human, it's downright natural. **5.** He who laughs last, probably has a back-up.
